Your Obligation

The life of a Utility Patent is currently 20 years. While we make every effort to stay in touch, you as the client must keep the firm informed of your contact information. Please update us via email concerning all changes to your address, email, phone number, and so forth, as applicable.

Duty of Candor

There is a duty on the part of those involved with the invention (including inventors, attorneys, etc.) to disclose all information which is material to the prosecution of your patent application. Thus, if you or anyone at your company (if applicable) is aware of material information which may affect the examination of the patent application for your technology or invention, including any public disclosure by you or another before your filing date, it must be forwarded to the firm and provided to the USPTO. This is an ongoing duty until issuance of the patent application. Failure to provide such information may render a resulting patent invalid or unenforceable. See 37 CFR 1.56 for more information.

What to Expect at the USPTO after filing a non-provisional application?

A Patent Examiner at the USPTO will be assigned to handle your respective applications. He or she works under a supervisor. We will do our best to communicate with the USPTO to get your patent issued, but there are no guarantees, as the process can be subjective.

Prosecution proceeds with at least the following major steps:

1. Office Actions, Interviews, and Responses communicating back and forth with the Patent Office.
2. Issuance verifying that all information is correct and printing the patent.
3. Maintenance Fees payment fees at years 4, 8, and 12 of the patents.

Note: The firm does not keep track of the Maintenance fee payments. It is your responsibility to make sure that the Maintenance fee is paid on time for your patent after the Patent issued by the USPTO.

Other requirements may also arise, such as continuations, appeals, and foreign filing. These issues will be explained in due course and as necessary.
